Date:

MATH: Unit 9 Vocabulary

1. Factor Pair: a pair of whole numbers whose product equals a given whole number
2. Divisible: a whole number is divisible by another whole number when the quotient is a whole number and the remainder is 0
3. Prime Number: has exactly two factors, 1 and itself
4. Composite Number: has more than two factors
5. Prime Factorization: Every composite number can be written as a product of prime numbers
6. Factor Tree: a diagram that shows the prime factorization of a composite number
7. Common Factor: a number that is a factor of two number
8. (GCF) Greatest Common Factor: of two numbers, the greatest number that is a factor of both numbers
